

Stinger Bore Cleaner™

Field Tested & Approved

A SMALL SAMPLING OF COMMENTS FROM SHOTGUN OWNERS
THROUGHOUT THE UNITED STATES THAT USED THE STINGER.

All are members of the North American Hunting Club.

These comments were made after testing the Stinger Bore Cleaner™ for the first time.

Field Tested Seal of Approval - February 1, 2008

"Did an excellent job of cleaning and lubricating the barrel in 1 pass!!! I shot 200 rounds of shells through my gun and then used the Stinger Bore Cleaner and the barrel was spotless after 1 pass." - *Scott Freidig*

"I am very diligent about keeping my guns clean. At first, I was skeptical, because the product seemed too good to be true. However, the results were impressive. This product left the bore clean and lubricated, without much effort from me." - *Paul DeBlauw*

"I loved this product. I hunt a lot of birds (quail, dove, etc) but tested this product during my trapshooting practice. It worked flawlessly and cleaned my trap gun great after 100 rounds. Fellow Trap Shooters were very impressed also. The Stinger Bore Cleaner actually makes cleaning your bore a barrel of fun." - *Darin Ferguson*

"This product works. It is a very fast way to get your gun clean. It can be used in the field, at home, or at the range. I couldn't believe how well this cleaned my gun. I would recommend this product to anyone." - *Jason Buslaff*

"For a quick clean in the field or while shooting at the range this product is awesome. I highly recommend it and will be carrying one of these every time I shoot my shotgun." - *Joshua R Bott*

"At first look, I thought this product was a waste of time. However, I took a friend to the skeet range and we each fired 50 shells thorough our own shotguns. Then we used the Stinger Bore Cleaners while at the range. We were amazed at the great job they did. We ran the Stinger through the bore two times and the bore looked like new. I will definitely use this product every time I finish shooting either at the range or in the field! A great product, I strongly recommend it!" - *Kevin Scharfenkamp Life Member*

"The long exhausting hours spent in the field can easily make me neglect proper firearm care. This product is extremely easy to use and you can clean your gun quickly." - *Jason Huntley*

"This product is the easiest way I've ever seen to clean a gun and also does a very good job!!" - *Brian Marks*

"I recommend this product for the reason it did a really good job cleaning my gun. I was also like a kid with a new toy when I used it. I really got a bang out of it. But all joking aside, it did what it was supposed to do and for me it did a great job, I will continue to buy and use this product." - *Chad Thomas*

"Found it very useful after shooting trap to put one in the chamber and clean the gun at the range so I could put the gun right back in the vault." - *Robert D. Kessler*

"This is an excellent product that provides a quick way of cleaning your weapon. This product is ideal for taking on hunts away from home. Rather than packing a bulky cleaning kit you just throw a couple of the Stringer Bore Cleaners in with your ammunition and you have a quick effective way to clean your weapon without taking up a lot of space in your bags." - *Phillip D Hendrick*

"I would recommend this product as I used this on a gun that hadn't been cleaned in a few years. With three passes through the barrel all the build up was cleaned off the barrel looked great." - *Mark Kreiger*

"I used Stinger Bore Cleaner on my Ruger over/under and my Remington turkey gun. It's quick and convenient. I cycled the wad twice with very good results. Convenient cleaning kit in a very small package. Just leave it in your shotgun case." - *James Kaylor*

"It takes the hassle out of cleaning your shotgun.. I would recommend this product to all sportsmen. I will have some on hand this hunting season, thanks!" - *William Barber*

"The Ease of use of the Stinger bore cleaner made cleaning my 12ga. a breeze! I used it on both of my barrels with great results in both." - *David Hazeltine*

"How much easier can you get. I really like the fact that you can go hunting, when you're done, just put one in the barrel and shoot, pull it out and your done." - *Sandra*

"I would recommend this product to fellow club members, it worked really well. My son does a lot of skeet shooting and he really liked it for its ease of use." - *Stacey Sorensen*

"The Stinger Bore Cleaner is excellent for a quick cleaning of the bore after a day of shooting or on the range between several shots. I have used the bore cleaner in both cases with excellent results." - *J.D.Stephens*

"I really like this product. I felt like it was a little on the costly side for a 1 time use item but it definitely did the job. I would recommend this to other members but maybe a little lower price?" - *Chad Doyle*

"Stinger Bore Cleaner offers a giant cleaning power in a small package! Having the ability to carry a small, compact cleaning agent versus a complete set of cleaning rods, patches, and solvent into the marsh or woods is wonderful; also a great small cleaning package to use at the range. To carry a complete cleaning setup the size of a shot shell, is a no brainer versus everything else you would need to carry. Carbon buildups can cause miss-hits while shooting clays, now I (you) have an easy and accessible way to clean your shotgun anywhere." - *Matt Lindsey*

There were several comments regarding the resistance of the Stinger when being pulled through the bore. We have already addressed that issue and made it 30% easier to pull. There were a few comments like, "while not as portable or easy to use, other methods were just as effective." And, there were several comments about the price, mostly saying it would be better a couple dollars less or, more cartridges in the package. Overall, 80% of the users gave it a good to excellent rating. Clearly, from the comments above, we have touched and reached the market we knew was out there!

We market the product as a quick, convenient, complete and disposable method for cleaning your shotgun bore. We do not expect it to replace all current methods. We are providing a product that was requested by and designed by shooting enthusiasts that wanted something fast, convenient and fun. Something they would use! Again, from the comments above, we have addressed these issues and created a new product that will capture a percentage of the market that is, to some degree...untapped.
